Syllabus Details

Syllabus ID:	13164
Syllabus Name:	**UI/UX Design_Thiết kế trải nghiệm người dùng**
Course Name English:	**UI/UX Design**
Subject Code:	**WDU203c**
Learning-Teaching Method:	Blended,Online,Active learning,Inquiry-based Teaching
NoCredit:	3
Degree Level:	Bachelor
Time Allocation:	Study hour (150h) = 84h online + 3h offline + 1h TE + 62 h self-study
Pre-Requisite:	
Description:	Integrate UX Research and UX Design to create great products through understanding user needs, rapidly generating prototypes, and evaluating design concepts. Students will gain hands-on experience with taking a product from initial concept, through user research, ideation and refinement, formal analysis, prototyping, and user testing, applying perspectives and methods to ensure a great user experience at every step. This course concludes with a capstone project, in which learners will incorporate UX Research and Design principles to design a complete product, taking it from an initial concept to an interactive prototype.
StudentTasks:	1. Complete the online courses and get all specialization certifications to be allowed to take Final Exam 2. Final Exam included Final Theory Exam (TE): 100% 3. Students who complete all MOOCs before the course deadline will receive 1 bonus point; otherwise, no bonus point will be awarded. 4. Completion Criteria: Final TE Score >=4 & (Final TE Score + bonus) >= 5
Tools:	- Internet
Scoring Scale:	10
DecisionNo MM/dd/yyyy:	932/QĐ-ĐHFPT dated 08/22/2025
IsApproved:	**True**
Note:	
Is Scored:	**True**
MinAvgMarkToPass:	5
IsActive:	True
ApprovedDate:	8/22/2025

8 LO(s)

No.	CLO Name	CLO Details
1	CLO1	Be able to explain what is involved in UX research, including conducting interviews, evaluating systems, and analyzing systems using principles of good design
2	CLO2	Be able to describe about the work involved in UX Design, including the generation of promising design solutions and the creation of prototypes at multiple levels of fidelity
3	CLO3	Be able to describe numerous techniques to gather data from and about users
4	CLO4	Know how to design and conduct tests with users
5	CLO5	Be able to apply techniques such as sketching, scenario development, storyboarding, and wireframing
6	CLO6	Know how to turn wireframes and interaction architecture into interactive prototypes that can be tested with prospective users and iteratively refined into a high quality design
7	CLO7	Be able to describe techniques for gaining UX insights from large numbers of users, including web analytics, A/B testing, and remote unmoderated studies
8	CLO8	Know how to design and carry out an integrated multi-phase user experience research and design project

Download All Student Material 12 sessions (45'/session)

Session	Topic	Learning-Teaching Type	LO	ITU	Student Materials	S-Download	Student's Tasks	URLs
1	Introduction to User Experience Principles and Processes - What is UX? What are UX Research and Design? - UX Design Overview - How Do People Perceive Information? Offline 1: Introduction to the online course WDU203c	Offline,Online	LO1, LO2	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed) All students should participate in offline slot (if any question)	

Session	Topic	Learning-Teaching Type	LO	ITU	Student Materials	S-Download	Student's Tasks	URLs
2	- How Do People Act in the World? - Design Heuristics - Heuristic Evaluation and Course Wrap-up	Online	LO1, LO2	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
3	Understanding User Needs - Introduction and Qualitative Research Overview - Interview Protocols	Online	LO3	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
4	- Interviews, Observation, and Data Extraction - Affinity Walls and Analysis - Conclusion	Online	LO3	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
5	Evaluating Designs with Users - What is User Testing? - User Test Basics - Getting More Out of User Testing - Analysis and Reporting - User Test Report	Online	LO3, LO4	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
6	UX Design: From Concept to Prototype - Introduction to the Design Process - Ideation - Design Constraints and Making Choices	Online	LO5, LO6	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
7	- Building Blocks of User Interaction - Low to Hi-Fidelity Prototyping - Conceptual Issues in Prototyping and Design	Online	LO5, LO6	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
8	UX Research at Scale: Surveys, Analytics, Online Testing - When and How to Use Surveys - Asking the Right People (Coverage Error) - Getting Answers (Nonresponse error) - Writing Questions (Measurement Error)	Online	LO7	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
9	- About Research at Scale - Behavioral Analytics - Remote Testing - A/B Testing and Preference Testing	Online	LO7	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
10	UX (User Experience) Capstone - Introduction & Milestone 1 - MILESTONE 2 - MILESTONE 3 - MILESTONE 4 - MILESTONE 5	Online	LO8	ITU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	
11	- FINAL REPORT	Online	LO8	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed)	

Session	Topic	Learning-Teaching Type	LO	ITU	Student Materials	S-Download	Student's Tasks	URLs
12	- FINAL REPORT (cont.) Offline 2: Review User Experience Research and Design Specialization (Spec)	Offline,Online	LO8	TU			- Watch all videos, read all materials in the MOOC - Finish quizzes, self-assessment, assignments and take part in discussion boards (if needed) Deadline of Coursera completion: End of Friday of the week. All students should participate in review slot (if any question)	

8 Constructive question(s)

No.	Session No	Name	Details
1	1	CQ1	Manipulate logical expressions and use logic for inference
2	1	CQ2	Perform basic operations on sets, functions and sequences
3	2	CQ1	Analyze basic algorithms written in pseudo codes and determine theirs complexities
4	3	CQ1	Discuss applications of modular arithmetic and analyze algorithms on integers
5	4	CQ1	Use induction and recursive definition to prove a statement or to describe an object, and write recursive algorithms
6	4	CQ2	Solve counting problems
7	4	CQ3	Analyze the structure of a graph and find shortest paths in a weighted graph
8	4	CQ4	Analyze the structure of a tree and describe algorithms using trees
